A single solution from hire to retire.

- Leverage a single self-service experience. Employees can request time off and check payslips in the same application online or from a mobile device.
- View real-time, detailed journal lines before payroll completes and have them seamlessly post to the general ledger.

Flexibility to address unique requirements.

Traditional payroll applications provide hard-coded, out-of-the-box packages that are often unable to accommodate specific business needs. The flexible and intuitive configuration in Workday supports your organization's advanced requirements.

- **Robust calculation engine:** Automatically calculate pay results for each period so you can view up-to-date payroll information anytime, anywhere. The continuous calculation in Workday streamlines payroll processing by automatically recalculating payroll results in real time as pay-impacting events occur.
- **Highly configurable:** Set up accumulations, balance periods, and balances according to your current calculation and reporting needs. Arrange workers into logical pay groups according to the needs of your organization.
- **Role-based and segment-based security:** Access pay results with configurable role-based permissions. Configurable security improves collaboration, giving business partners outside of the payroll department the ability to provide input and view results before payroll completion.
